

No By Election For Town Council or School Board

N Willis and A R Ballantyne
Elected By Acclamation

Nominations for vacancies on the School Board and Town Council were held in the town hall last Friday with Mr Frank Baird as returning officer. For the council Mr Norman R Willis was nominated by A E Shaw and J R W Cann. As there was no other nominee Mr Willis was declared elected by acclamation.

Mr Willis is a young man who came to Redcliff from England in 1924 when he was 21 years of age. Although he was a nominee of the local S J group he assures the Review he will use his best judgement to give a square deal to all citizens of the town.

For the School Board Mr A R Ballantyne was nominated by G H Worts and C T Hall and Nida Luna was nominated by H Johnson and C E Newham. The vacancies were caused by the resignation of A L Bryce from the council and Mr Kitchen from the school Board.

If there should be an election for trustees the voting will take place next Monday.

In conversation with Mr Luna after nominations closed he informed the Review that as there was another candidate in the field he would withdraw as he felt Mr Ballantyne was better qualified to fill the position as he was a longer resident of the town and more familiar with local conditions. Mr Luna said he accepted the nomination at the request of his nominators and he was willing to do his share of work in the interests of the town provided the position was vacant. Being a young man and a resident he felt he could wait for municipal honors and save the expense of an election.

This means there will be no election for either the council or School Board.

Mr W A Pratt, who carries the mail to Bingville post office, now has a fine new coupe-truck combination for this purpose. It is a neat car and serves the purpose very nicely for carrying mail parcels and passengers.

Redcliff Young Man Weds Flat Young Lady

Bergeron — Heather

A wedding of special interest to Redcliff young people took place in St. Patrick's church, Medicine Hat, last Friday morning when Mr Clifford Bergeron, only son of Mr. and Mrs. J. Bergeron of Redcliff, was united in wedlock to Miss Rosa Heather, youngest daughter of Mr. and Mrs. J. Heather, Medicine Hat, by Rev. Father M O Fitzpatrick.

The bride was becomingly dressed in a brown ensemble, was veiled and wore a train. The groom was in a blue tuxedo. The ceremony was performed by Rev. Father M O Fitzpatrick.

The bride was becomingly dressed in a brown ensemble, was veiled and wore a train. The groom was in a blue tuxedo. The ceremony was performed by Rev. Father M O Fitzpatrick.

The young couple will reside in Redcliff where they have taken up quarters in the Hall block, Broadway.

LOTS OF FEED-FOOD THE DROUTH AREA

The Alberta government has made care of shortage in drought areas, according to figures issued by Hon W N Chant, minister of agriculture. No shortage of stock feed is expected throughout the province as far as can be ascertained, supply in central and northern sections is adequate even though the crop is short in the southern sections.

The output of gold mines in Canada this year is more valuable than all the Canadian wheat sold.

A Plamine, Social Credit member of the legislature for Cypress, is recovering from nonoxide poisoning which he suffered some days ago while driving his truck to his home and ranch here from Taber. The truck was loaded with coal. Mr Plamine was driving in a loaded cab and inhaled some of the poisonous fumes from the exhaust. He was forced to go to bed but is around again now.

Plans Are Made For Opening the Little Theatre

First Show To Be Held Early
In February

At a meeting of the Little Theatre Association on Wednesday evening it was decided to hold a popular decision on the play competition early in February.

The secretary, Miss M. G. S. will accept applications from organizations willing to compete and share in the proceeds on and after Monday, October 2nd and until such time as the evening program is complete. A nominal fee of one dollar should accompany each application. This amount will not be returned but will be used for the competing organization of a membership ticket to the Little Theatre Association for the year.

Suitable plays for production will be supplied free to all competitors. See your application in early November.

\$500,000 A DAY

Every business day last year life insurers and beneficiaries of life insurance companies operating in Canada received over a million dollars. Seventy-five per cent of this money went to living persons.

There could be no more striking indication of the democratic character and the beneficial influence of this the most co-operative business, in the Dominion. It represents 5,000 men and women—half the adult population of the Dominion—half the electors of the provincial.

Mr. and Mrs. F. Cann, who took in the trip to Vimk Ridge returned home Tuesday. They went some time in England visiting relatives and friends.

KING EDWARD VIII
Who has been an intimate friend of Mrs. Simpson who won her divorce case Tuesday. There are rumors that King Edward will marry Mrs. Simpson who is an American by birth.

Laborers' Compensation May be Lowered

Reduction of Interest Will Cut
Down Revenue

Revenues of Workmen's Compensation Board of Alberta are affected by the government's compulsory reduction in interest paid on provincial bonds. It is shown by the Elliott-Walker report on the fiscal and economic affairs of the province. The Workmen's Compensation Board has \$2,339,000 invested in Alberta provincial bonds. It is estimated that the board's revenue from this source will be reduced after the present year from \$114,000 to approximately \$84,000.

This large amount of reduction in the previous earning capacity of the Workmen's Compensation Board funds looks like a serious blow to all those who come under the workmen's compensation. If the Board is to keep its compensation up to a sufficient amount to guarantee the present rate of compensation now given to injured workmen, it looks as though the Board will either have to increase the workmen's compensation tax or reduce the amount paid to injured workmen.

The University of Alberta, whose pension funds, and several other helpful organizations, with money invested in Alberta bonds, will also be sorely hit by the government's compulsory reduction of interest.

Dam Completed in Bingville District

Work on the dam near Jack's farm in the Bingville district is now completed for the purpose of conserving surface water in that district.

The work was financed by the Tiley East Area Administrators and was supervised by Mr J. M. Farmers of that district were employed for its erection.

Play The Game On Hallowe's Night

As next Saturday will be hallowe's night we suggest that those who want to play pranks be very careful as to what they do. Nobody objects to young people having fun but it should be kept within bounds. Damaging of property or playing tricks which might possibly be dangerous to citizens are mean and foolish and may get those who indulge in them into serious trouble and expense.

At a meeting in Edmonton last Tuesday, Hon. W. A. Fallow provincial minister of Public Works, referred to those who count on the assistance of thugs and bums of the underworld who can be bought for a price.

Mr. Fallow was referring to those whose votes were influenced by the promise of \$25 a month, it is very unkind and ungrateful of him as there is no doubt that a large majority of those voters were sincerely convinced that such monthly donations would improve conditions generally.

Dominion Cannot Loan Money to Provinces

Alberta Needs Funds to Meet
Bonds Maturing Nov 1st

The provincial government received word this week from Finance Minister Charles A. Dunning, stating that the Dominion government had no statutory authority to advance money to the provinces from the federal treasury to meet bond maturities.

This was an answer to the request from Premier Aberhart for federal assistance in meeting the \$1,250,000 bond maturity on November 1st.

When the province was in financial difficulty last year Mr. Dunning endeavored to establish a system of a provincial loan council but Mr. Aberhart did not agree to that scheme. "We will have to look around for some other source for the money," the provincial treasurer said.

Temporary Licenses For Alberta Motorists

Tickets Will Be Used From
New Years Till April 1st

Thousands of Alberta car owners are expected to be displaying shiny new "stickers" on their windshields when the new year opens.

These will be temporary licenses, permitting the operation of the car until the annual license period opens on April 1st to conform with the government's fiscal year.

Government officials say that it will be necessary for those who intend to operate their cars during the first three months of next year to obtain the "sticker" license. Whether the fee for this period will be one-fourth or one-fifth of the annual license has not been settled yet as the motorists with the province's government.

Under legislation passed at the spring session of the Alberta House, the annual motor license period is to begin from January 1, 1937, instead of January 1, which has been the opening date ever since car licensing was brought into effect here.

About 6,000 head of cattle have been purchased and processed for the provincial government from the dry areas to date, it was announced Saturday by the department of Agriculture.

Mr G P Cox, who has been C P R superintendent at Medicine Hat for a number of years has been transferred to Calgary. Mr J L Peilethorpe Superintendent at Edmonton will take the place of Mr Cox at Medicine Hat.

Collecting of Alberta newspapers as threatened by Premier Aberhart on many occasions was not supported by a majority of Social Crediters at the Athabasca constituency Social Credit convention at Colinton last week.

Town Council Holds Regular Meeting Monday

Very Little Business To Come
Before Meeting

Town Council met last Monday evening with Mayor Sangster in the chair and councilors Hope, Moore, Evans and Verhulst present.

Very little business of importance came before the meeting. Mr. H. Worts asked for rent of house at present occupied by S. Schneider on Third St. The mayor said as council was not a renting house his application could not be accepted at present.

Mr. Baird, returning officer for town by election, reported the results of nomination day, showing N. Willis declared elected as councillor and Nida Luna as school board member. A R Ballantyne and Nida Luna nominated as candidates for the one vacancy on the school Board.

A request for \$1,000 from the school board was granted. George Evans wrote offering \$60.00 for house on Third St. The offer was accepted on motion of councillor Moore.

Accounts as passed by the finance committee were approved for payment on motion of councillor Hope.

The secretary was instructed to make inquiries as to rates of different companies for insurance on the town hall and report at next meeting.

Nora Lawson wrote asking for permission to rent house previously occupied by the late Mr. Gorham. The matter was referred to the building committee to report at next meeting.

In answer to a letter written to the Board of Public Utilities Commission asking for particulars re the effect on the bond indebtedness of the town on the new legislation, the commission stated that the legislation referred to is not effective until it is proclaimed by the Lieutenant Governor in Council. A motion by councillor Evans was passed confirming regulations.

War Strength of Big Powers Revealed

Russia Leads With Army
Force of 1,300,000

A vast increase in the armaments of the world was shown by the League of Nations armament year book for 1936.

Soviet Russia's armed forces were placed at \$1,300,000 and the year book said, "The Russian army is capable of 'absorbing' and training an annual maximum of 400,000 recruits."

The figures include the army the navy and the air force.

The league, said the book, has been unable to obtain accurate official data on Germany's armed forces, but "according to unofficial publications the effective strength for the German army would be 550,000 officers and men."

Sir Edward Britten, commander of R M S "Queen Mary" died in England yesterday.

Nerve Specialists Busy

London Doctors Hope Suicide Bomb May Be Solved

Nerve specialists are conducting an investigation which they believe will reduce the number of murders and suicides.

In many cases where sudden emotional disturbance is the cause it is thought that by treatment before the danger period is reached tragedy might be prevented.

The investigation, which consists of an exploration of the sympathetic nervous system, the great uncharted area of the human body, is being carried out by the National Hospital for Diseases of the Nervous System, Queen's Square, London, W.C.

Nervous disease cases more deaths than tuberculosis, while it has also been ascertained that one in every three people who are unable to work through ill-health are suffering from "anxiety neurosis."

"We are now trying to find the causes of abnormality," an official of the hospital told the News of the World, "and why it is that apparently normal people suddenly go mad and commit suicide or murder."

"Once we discover the cause, we believe that by treatment we may be able to prevent a great many of these tragedies."

"Unfortunately, we are handicapped by lack of funds. This hospital, where 300 operations for the removal of tumors of the brain are conducted each year with 90 per cent success, is the only one in the world co-ordinating every branch of research into the various nervous diseases."

"Specialists from all over the world attend our lectures, but we are cramped for space, and have to use makeshift and antiquated apparatus."

By means of a film, "The Missing Reel," which shows the stress and strain of modern life and its results, the hospital is making the first public appeal for funds in its 77 years history.

In this film, shortly to be released, the public will be able to see for the first time an actual operation on the brain taking place.

The rebuilding scheme, for which the appeal is made, is to cost £130,000. The Rockefeller Foundation has promised £50,000 of the fund, with a further £60,000 for endowment, provided the remaining £130,000 is raised by the hospital.

Fine Jacobean Mansion

Owned by Lord Lethbridge, House Dates Back To 1630

Blicking Hall, in Norfolk, which Lord Lethbridge lent to Mr. Baldwin, is one of the finest Jacobean mansions in England, but the cost of its upkeep is no heavy task in recent years it has been empty since the death of its last owner.

Not its pictures, by almost every well-known English artist, are famous. So were the contents of the 137-foot long library until Lord Lethbridge sold some of the best of them in America.

For over £100,000. There is a tapestry presented to a former owner by Peter the Great, a blood-stained secret site, where a priest is supposed to have been murdered at the time of the Reformation, and a family portrait placed by a drunken brawl, recalls the News of the World. Outside is a beautiful park, enriched by wooded knolls and a crescent-shaped lake a mile long. It was at Blicking that Henry VIII. met Anne Boleyn. But that was in an earlier house. The present hall dates only from 1630, although the title deeds relating to the land go back to King Harold's time.

Japanese Goods Buy Railway

Orders Placed By Russia For Variety Of Materials

Under the terms of its agreement with Japan for sale of the Binn-Eastern Railroad, a large part of the purchase price is to be paid in goods. The Soviet government has placed in Japan orders for products worth 70,000,000 yen. This represents 75 per cent of the amount to be taken in kind.

Building materials, vegetable oils, tea, metals, textiles and electric motors account for a large part of the order.

In her new wig-out a lady passed out of the town. "She's lucky," commented Mrs. Muffin. "I can't get a new fur coat, a fashionable hat."

"Then, now," broke in Mrs. Joyner, "don't talk like that. You never know what you can do till you cry."

Will any of our keen readers, explain why an angler will sit watching and waiting at a water hole for hours for a fish, but if he had to wait a few minutes for dinner he becomes impatient?

Preserving Fence Posts

Coal Tar Or Creosote Treatment Prolongs Life

Interesting information with regard to the preservation of fence posts has accrued from experiments carried out at the Plant Experiment Station of the Dominion Department of Agriculture at Maniwic, Alberta. These experiments have been conducted to determine the relative merits of treated and untreated fence posts. In an experiment started in 1927, posts were treated with coal tar or creosote while other posts were left untreated.

In 1930 all the treated posts were found to be sound but all the untreated ones were either completely rotted, a few inches below the ground or showed such advanced stages of rot that they will have to be replaced in 1934 and 1935.

At the end of a nine-year period, a comparison of the two treatments, tarring and creosoting, failed to show any definite advantage in favour of one or the other method. However, where cost and equipment are concerned, there is a decided advantage in the tarring treatment. The cost of tarring is from 1½ to 2 cents per post, whereas creosoting costs from 6 to 8 cents per post, depending on the size of the post. Moreover, a creosote dipping apparatus is more elaborate in construction and a longer time is necessary to do the job thoroughly.

Another experiment in progress is the treatment of other materials with various kinds of wood. Pressure-creosoted (purchased commercially), bleached and charred posts are being tested along with tarring and creosote-dipped posts. Charring has no apparent advantage over tarring, as all the charred posts were as badly rotted as the untreated. Pressure-creosoted pine posts show excellent results, but they contain a high initial cost for fencing large areas.

The bluestone treatment shows very good results, especially with poplar posts. The cost of bluestoning is usually less than 2 cents per post, the cost of the other methods being more expensive. The treatment and method of treatment being quite simple.

RESCUED 1,120 FROM RUINS ON ALCAZAR

This is what the historic Alcazar fortress in Toledo looked like, after seven weeks of battering by shells, bombs, and mines. Strangely enough only 80 persons were killed outright and about 1,120 came out alive, although hundreds of them were wounded.

About Pests

American Woman Does Not Place Squeeze In This Category

An American woman has just received an awful advice on how to handle a pest. The pest in question is a cockroach, which has been driving the town to distraction.

The advice came from a Mrs. R. Roberts, of Buffalo, N.Y., who wrote: "To the mayor and police of Belleville, N.J.:

"To whom it may concern: Just read in the local paper an account of cockroaches being pests. If you were hungry, what would you do?"

"Has it ever occurred to you and the people of your town to feed the cockroaches? They have as much right to live as you and I."

"I find here if you feed them they do not destroy anything. Try buying a few peanuts or any kind of nuts. I certainly don't approve of your attitude. I don't find cockroaches pests. We feed them. We find children pests here."

An Elusive Burglar

Police Have Two Reasons For Naming "Planel Foot" Foot

Police in London, England, are singing a song of adoration about an elusive burglar.

"Planel Foot's back in town," they call the unknown plunderer "Planel Foot" for two reasons:

He can't catch him to find out his real name and he leaves strips of flannel wherever he completes a little job of ransacking.

"Planel Foot" has been active about 25 years—taking time out for an occasional vacation. During the world war he was "somewhere in France" aiding Great Britain's forces.

The Blind He Know

The young bride of an official in the Transal, new of the ways of the Territory, was buying some odds and ends at the local trading station.

"Now, have you a cocktail-shaker?" she asked the native assistant, who for a moment looked puzzled.

"Ah, no, missus," he said presently, his face lighting up "but we got some 'ver good feather dusters!"

Has Become A Business

Diving For Coins No Longer A Sport In Honolulu

Diving into the waters of Honolulu Bay for coins thrown by tourists from passing vessels has become a generally organized "racket," according to the frank admissions of members of the organization.

In some days, however, they admit the means will be found outside of the present racket system for bringing to the surface all the coins that have been missed by the diving racketeers and when that day comes they declare a small fortune will be in store for someone.

In earlier days, the diving for coins was a unique sport for island swimmers, before the idea of business organization or rackets had pervaded the islands. Now, it has become a business, moderately prosperous, that has handed the youths into an organization firmly controlled in a businesslike manner.

Folly Of Cutting In

Is Greatest Cause Of Accidents According To Statisticians

Government statisticians show that more accidents result from cutting in than from any other cause. Hardly a day passes when we do not hear of one—where the driver of one car, anxious to pass a minute or two, tries to get ahead of another which is probably running up to or over the speed limit, misjudges the distance and crashes into an approaching car.

There is seldom any legitimate excuse for an accident of this kind. But how often we see drivers taking a chance on getting ahead and snapping disaster by a hairbreadth—Own Sound Sun-Times.

Sounds For Enough

Rastus: "Look here. I don't told you all not to shoot mah roostah, ah!?"

Sambo: "Yes, ah I told you all to keep yo roostah outa mah garden, too, didn't I?"

Rastus: "Dat roostah wasn't in yo garden. He 'ee' had his neck through dat crack in de fence!"

Sambo: "Well, dat's all I shot was his neck!"

Request Carried Out

Will Of Englishwoman Aids Inspection Of Tomb Every August

Though "resurrection men," like the infamous Harts and Hare, are an extinct race, their memory lingers in a curious ceremony which was observed August 12 in the churchyard of St. Nicholas, Sutton, England.

In the churchyard stands a huge stone tomb, built in 1777 by James Gibson, a wealthy London merchant, for the burial of himself and his family.

When the daughter, Elizabeth Gibson, died, in 1788, the fear of "resurrection men" stealing bodies was intense. By way of safeguard she left a considerable sum in trust to ensure that the vicar and churchwardens should open the tomb and inspect the coffins "every August 12th, for ever."

The annual inspection, preceded by a special service in the church, has been carried out every August 12 for 145 years.

Airplanes On Sound Track

Interferes With Public-Recording Studios Of British Companies

British movie studios are trying hard to keep the drone of airplanes flying overhead from getting on the talking-recording sound track.

One studio painted huge letters on its roof saying: "Please, Studio, Quiet, Please." It didn't work. The pilots only dropped closer to read what it was all about.

Then they saw a big yellow flag to warn the airmen away. They misunderstood and merely soared down to investigate.

For Muddled Powers

When moulting from or gaining deserts, place two crossed strips of heavy waxed paper in the mouth, leaving the end long enough to extend over the edges after the skin has been filed. When the freckling or hardening process is completed, you will find the desert turns out as if by magic from a tug at the free end.

The ivory-billed woodpecker is fast becoming extinct in the United States, while the pileated woodpecker is close on its heels.

Super Beast Of Past

Largest Mammal Known To Science Once Lived In Asia

The only life-size restoration in the world of the baluchitherium, the largest land mammal known to science, and which lived in Asia some 35,000,000 years ago—in a hearing condition. It will join the exhibits of the American Museum of Natural History.

Dr. Walter Granger, curator of fossil mammals, and Dr. William K. Gregory, curator of comparative and human anatomy, opened several years sorting and studying some 200 baluchitherium bones preliminary to the restoration of this superb and the prehistoric past. The baluchitherium is described as an over-sized, hornless rhinoceros. It lived in Asia when what is now the Gobi desert was a paradise of woods and water.

So far as is known, the baluchitherium was the largest land mammal that ever lived. It was taller than a giraffe, weighed as much as two ordinary elephants and the lower part of its body, resting on four massive legs, was so high above the ground that the eyes appeared to walk beneath it without removing his hat. The restoration was constructed on the basis of the largest bones of the species now found.

The restoration, which weighs more than a ton and made of plaster of paris on a wire mesh, is in the form of a sea beast.

Unlike the elephant—which it entered the class of mammals—which it resembles in appearance—the baluchitherium had neither trunk nor tusks, but the horns were great incisors in each jaw. These, it is believed, were used by the animal in tearing leaves and twigs from trees and bushes on which it fed, at the rate of several hundred pounds of food per day. It is estimated. The name of the beast is derived from the fact that first baluchitherium fossils were found in Baluchistan.

Writes Backward

Peculiar Of Boy's Mind Is Puzzling Physicists

A "mirror-boy" whose mind forces his fingers to write figures and letters backward is puzzling physicians of a town in Virginia.

The youngster is 12-year-old Harold Elliott, unable to advance beyond the second grade in school. His teacher, Miss Eleanor Mangert, reports that the queer quirk in his mental makeup which reverses objects he sees.

When he copied a word, he started at the end.

"But, when I held a large mirror to the paper and told him to copy from the mirror," Miss Mangert said, "he started with the first letter just as any child would do."

Dr. L. C. Gallagher expressed the opinion the boy's condition is caused by incorrect co-ordination of his eyes and brain.

More Cattle Shipped

Figures To Date Show Decided Increase Over Last Year

Cattle shipments to Great Britain and the United States for the year to date amounted to 229,479 head, compared with 106,769 for the corresponding period in 1935, the department of agriculture has reported.

Shipments to Great Britain were 81,617 head against 8,513 last year, while 148,062 head were exported to the United States compared to 104,846 in 1935.

During a recent week 8,512 head, consisting of 3,917 beef cattle, 315 dairy and 1,280 calves, were shipped to the United States. These 4,512 also 1,228 head exported across the line.

Cattle shipments to Great Britain in the same period were 473 head.

Just As Shaded

Alfred Sir to you.

And those have been the Christian names of Alfred Sir Pugh, of Head-croft, Pershore, Worce., ever since his politics mother took him to be christened at Pershore Abbey 86 years ago.

"Name this child," said the clergyman.

"Alfred, sir," said Mrs. Pugh. And down it went in the register—London Sunday Pictorial.

The magnetic poles on the earth are not directly opposite each other. A line running from one to the other would miss the centre of the earth by about 750 miles.

Italy has returned to Austria 400 guns which were captured in the World War.

In worst hand, rainfall often is 25 per cent greater than in open spaces.

BABY SHOW OVER-TAXED JUDGING ARRANGEMENTS

Owing to a hitch in the plans for the National Baby Show at Crystal Palace, London, England, only one dozen were engaged to act as judges, but there were 25,000 competitors. Eight additional doctors were quickly secured and the police also judged.

Blake makes a Fresh Start

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA CRAIG
CHAPTER VII.—Continued

He answered her as swiftly: "I know better than to use my regular like with you. Please give me credit for Anna good money."

Starr could not have told why it was, but suddenly she felt her eyes drawn away from her dance partner as though toward a magnet. A light to one side of the room, Michael Fairbourne was standing alone, watching her. Handsome, debonair, Michael. He smiled when her eyes met his and his own gray eyes spoke a message.

"They said, 'Well done, Starr!'"

He was appealing her as he might have applauded an actress who was giving an extraordinary good performance. That was all she meant to him. "What was it he said?" "All I ask is that you keep your name in the headlines!"

He was pleased to see her making a hit with Lance, because any new name of Lance Marlowe's was bound to be the subject of plenty of conversation—and newspaper articles. Every mention of her name by word of mouth, through the tender mercies of the columnist, or in the straight news would send the sales of his book soaring.

Subtly within Starr Ellison was born an angry resentment against Michael Fairbourne. How dared he stand there so snug and self-satisfied, watching her carry on her pitiful tuckers? What did he know of the reasons of desperation which had urged her to be his open enemy to riches via the publicity route? He was making her dangle on the end

of a string like a puppet, and adding the supreme insult of applauding her gyrations. How dared he!

No, that was not quite fair. There was a two-sided bargain. Though he would never guess the reason for her acceptance of his offer, he had made her understand only too well what he expected of her. His, in the desperation, had been glad enough to accept his offer. How could she have known that association with Michael would stir so much of bitterness in the depths of her? How could she have guessed, for one wild moment, how it had come to her that she was times when he was alone with her in that Egyptian penthouse which was the result of his crazy dreams that Starr would come to him, and she was afraid to trust herself to speak? How could she ever have guessed anything of this electric quality in the flame of him, that too often shined in his gray eyes when he did not imagine it, and that sent shivers warning signs dancing along her veins?

Oh, it was going to be hard to play the game to the end—so very hard! But yet it she must, and would. Yet it took all that was in her sometimes to keep from reacting when they would be talking together over some point and he would be so close to her that she could hear his heart pounding, she would have to hold herself in to keep from away.

Her lids dropped over her eyes so that neither man could see her eyes. Starr answered her own question. Life had been a question before. Now there was a new one—the question of what to do when love came unbidden. She knew what the answer was. She must learn to skim the surface of life as Lance Marlowe did. She turned of the man whose arms encircled her, suddenly feeling the need of his worldly philosophy. He was smiling at her as she made a step.

"Have a little drink?"

"Don't they always say, 'Noches

"I always thought this talk about tea and coffee being harmful applied only to children."

"Oh, yes. Really."

"I don't know. The caffeine in tea and coffee can upset nerves, cause indigestion, or prevent sound sleep."

"If you suspect that tea and coffee disagree with you... try Postum for 26 days. Postum contains no caffeine. It's simply whole wheat and bran, roasted and slightly sweetened. It's easy to make, and costs less than half a cent a cup. It's delicious, too... and may prove a real help."

FREE! Let us send you your free supply of Postum Literature. Complete Postum Dept., 101 General Foods Limited, Scarborough, Ont. 537

"I don't drink 'em do you any harm?" Starr laughed, but shook her head. "No—I'm not so sure."

But he was leading her toward a party concealed bar, elaborately lit up in modernistic blue and silver. Again Starr shook her head faintly. He persisted. "Do you good. A little drink sours life's sharp edges."

She gave a queer little laugh. "But my life hasn't any sharp edges," she said.

Lance's restless eye probed. He reformed, with a keenness of perception that was almost uncanny: "Because! Everybody has sharp edges?"

"Even you?" she parried.

"Even I?" he mocked. "Most particularly because I fear you as I had hoped to fall for me as rapidly as I had done."

That destroyed their seriousness. Suddenly Starr was laughing again, skimming the surface.

A gay little group was gathered around the bar. Stephanie was there, but Starr did not see Michael. Lance glanced around as he found a high stool for Starr, calling to the bartender: "Champagne!" To the group at large he suggested: "Join me! How about us making a community toast? A toast to whom?"

A blond man whose hair was touched and dress shirt airy waved away from the bar and waved his glass. He was gloriously drunk, and on moment later it was, quite as plain to Starr as he had been participating in a conversation that had for its subject Starr Ellison and the debut party being given in her honor by her publishers. The bartender was pouring the champagne. The blond man looked out: "A toast! You'll give a toast! Let's all drink a toast to the newest and loveliest chainmail of Lance Marlowe's penitence—Starr Ellison. Long may she wave!"

The glass dropped from Starr's nervous fingers and splintered against the bar. Stephanie giggled, breaking a tense silence. Her eyes flashed with Starr as she lifted her glass and drank deep. It was a deliberate insult.

The drummer man's words roared in Starr's ears, mingled with the same thought: that the man in his cup may have known whereof he spoke, and that it was true. Very likely he knew that Lance intended to make Starr his mistress; that perhaps she had already agreed, so that it was no longer a secret. Starr would be in character. Her reputation was against her.

Lance said quietly, as he advanced a threatening step, his face flushed: "Take that back!" The drunk away-

ed on his feet definitely and heard knowingly, his glance wavering from Starr to Lance, and back again. One of the girls squealed: "Oh, a fight!"

Stephanie's high voice cut in: "A fight, yes! For the honor of a woman who doesn't know what the word means! How execrable!"

Lance hesitated in his attitude of threatening, glanced once at Starr and then showed his good sense. He grasped the obvious blind insult by the neck and let it go. He found himself trembling like a leaf. Never in his life had she felt quite alone and friendless. No one approached her. But everything had caught up with her in a rush, overwhelming her. She was glad Michael was not there to be a witness to her humiliation, and then in the next breath was sorry that he was not. Had he seen, perhaps he might have been—no, he wouldn't be sorry. Why should he be? It was all good publicity, and that was what he wanted. That would have been all he could have seen in the entire episode. The human quantifier, or so a small matter as that. Starr might have a soul that could be hurt—that would only be a small matter.

Almost immediately Lance Marlowe was back, swinging along brightly, head high. As he passed her side Starr's lips formed the words: "What did you do?"

He said carefully as a slow smile flickered across his lips: "To Me (Continued)"

Royal Mint Is Busy

Greater Demand For Coins From Banks In England

At the royal mint they are working overtime making more money. A new system came into operation recently.

Increased activity has nothing to do with coronation activities. It is entirely due to a greater demand for coins from the banks.

An official of the mint explained: "There are fluctuations in demand, and it is not always possible to tell the real reason for some months."

"A demand at this time of the year, however, is almost certainly due to greater industrial activity, more employment, and consequently more wages."

Since now being struck will bear the image of King George.

Although King Edward had approved designs for the new coronation, the royal mint will continue to make King George coins until the formal approval of the King is announced to a royal proclamation.

Rattlesnakes in North

Reptiles Reported Killed 75 Miles North Of Edmonton

Ecological circles were amazed at Edmonton when E. L. Logan of Rochester, Alta., came to town with a 26-inch diamond-back rattlesnake and a six-foot bullsnake and reported they were killed by his 18-year-old son, Lloyd, four miles north of Rochester. That town is 75 miles north of Edmonton and hundreds of miles north of the usual habitat of those kinds of snakes.

They have never heard of either a rattler or a bullsnake being found farther north than Medicine Hat," said Dr. Winifred Hughes, acting head of the department of biology of the University of Alberta, when told of the find.

Building Large Bank

The German Reichsbank is to be the largest building in Berlin. When two extension buildings are completed within the next two years, the banking office will enclose 680,000 cubic yards—40,000 cubic yards larger than the palatial new Air Ministry of 2,500 rooms.

Handed over to foster-parents when a baby, a resident of London, England, who never saw his father, has been ordered to pay toward the building of his parent now on public relief.

Continued losses on the operation of railways in the Netherlands has made government assistance necessary, and the two large lines may be nationalized.

The possibility of the Coronation ceremony being televised as well as broadcast is being eagerly discussed in British radio circles.

"Plane Grounded in Desert"

Temperature Inside Cabin Reached 150 Degrees

How they replenished their drinking water supply with dew gathered in sponges from the aeroplane's wings was told by the passengers and crew of the Imperial Airways plane, which was grounded in the Arabian desert.

The liner came down in the scorching waste after having overshot the scheduled landing place of Bahrain in the dark.

If an R.A.F. aeroplane had not spotted the Horn through a break in the clouds as it was returning to Bahrain after a reconnaissance, it is probable there would have been several dead.

All the food left to the 15 passengers and crew was a few sandwiches, a little chocolate, a few bottles of water and mineral water, and a drain of whiskey.

There was a Bedouin village 20 miles distant, had they known, but it was impossible to move more than a few hundred yards over the blazing sands, under a heat which made the metal parts of the aeroplane impossible to touch.

The only living things to be seen were huge black scorpions.

By day the temperature inside the plane's cabin reached 150 degrees. At nightfall the passengers obtained relief by lying almost straggled along the floor, where a heavy fall of dew which dripped from the upper plane refreshed their parched throats.

Historic Anniversary

North Carolina To Celebrate Landing Of Sir Walter Raleigh

Most of us learned in school that Sir Walter Raleigh visited North America and took back the potato and tobacco with him to England. But a good many people would be surprised to give further particulars than this about his American adventures.

To such it will be interesting to learn that next year, on August 28, 1585, Roanoke Island, North Carolina, will celebrate the 350th anniversary of the landing of Sir Walter Raleigh and the founding by him of an English colony which was the first white settlement on the continent.

A settlement means homes, and homes mean children, so it was that on the above date the first white child in the New World, Virginia Dare, was born to Ananias and Rebecca White Dare, who had followed Sir Walter Raleigh overseas, as pioneers.

And, furthermore, the christening of the infant Virginia is said to have occasioned the first religious service in what is now the United States. In his Raleigh celebration at Roanoke Island, then, assumes both national and international importance and preparations for it are being made that are worthy of the occasion.—Quebec Chronicle Telegraph.

Where Bicycle Is Popular

Number In England Almost Doubled In Five Years

A London letter in the Ottawa Journal says what will be to many the most surprising fact revealed by this year's traffic counts is that the road vehicle which has been making the greatest advance in popularity in recent years is the humble pusher. The figures show that the number of pedal-cycles on our roads has almost doubled since 1921.

Though the bicycle is ubiquitous there are certain towns where it enjoys special popularity. Of these cities Oxford is believed to lead the list, a fact which suggests that even in this age of motoring it is not yet undervalued, who can afford to ride a bicycle. Southampton's town which led notably in the first great boom of bikes and bloomers in the early Nineties, still possesses an exceptionally large number of cycling citizens, who, like their parents and grandparents, still turn out in hundreds to the promenade, the Avenue and Common.

The enormous number of cycles in use may possibly offset the impression gained from accident statistics that cycling is the most dangerous form of road transport.

Did Not Earn Much

Plymouth's first labor lord mayor, H. M. McLeod, has gone off the stage. His continued working at the royal dockyard during his year in office. But one week this duties occupied so much of his time his weekly wage packet contained exactly eight pence.

Books have a bird language consisting of approximately 40 "words," or sounds, with particular meanings.

Bees of the sacred hive germinated 25 after having been kept dry 140 years.

THE Household Baker

Mildred Mae McKelvey, author of "The Household Baker," will send free information on cooking, baking and housekeeping. Write to her at 1014 Royal Avenue, Toronto, Ont. or 1014 Royal Avenue, Toronto, Ont.

Little Helps For This Week

Let the words of my mouth and the meditation of my heart be acceptable in Thy sight, O Lord my strength and my redeemer. Psalm 138:14.

The thoughts that in our hearts
Lord, make a holy, heavenly
thing.
And in innocence and grace
The issue of each guarded tongue.

There is another kind of silence to be cultivated, leader that is tongue as regards others. It is silence as regards one's self, not permitting the imagination to dwell overmuch on what we have heard or said, or indulging in picture thoughts whether of the past or future. It means that you have made much progress in the spiritual life when you can control your imagination so as to fix it on the duty and occupation actually existing, to the exclusion of the crowd of thoughts that are, personally swirling across your mind. You may not be able to prevent these thoughts from arising, but you can put them aside, and by the practice of such mental discipline you will attain that spirit of toward silence which draws the soul into its close intercourse with God.

Japanese and Malays are being displaced in Australia's pearl fisheries by white men, following the invention of a diving gear that makes it possible to reach a depth of 240 feet.

Hard to Fit?

HAVE you experienced difficulty in securing a dress to fit you properly? Do you find the dresses you order a little tight in the hips, a bit narrow across the shoulders or short in the sleeves? Do you find it hard to decide what type of foundation garment you require?

If these are your problems, then your figure probably is a little different from the average type. You are the type who should measure yourself very carefully or, better still, you should have somebody else do it for you. Never be satisfied to order the same size you had last time. Measure and make sure of the size you wear every time you order.

Why not write to EATON'S Stylist Service, enclosing your measurements, and I will be glad to advise you regarding your requirements. However, you must remember that I am not a shopper and act solely in an advisory capacity.

Interesting Local Items

Miss Todd, of Brooks, visited her parents here this week

Mrs G Davies, who has been in the hospital, has sufficiently recovered to return home and is now improving nicely

Mr. Perry, Manager of the local pottery plant is at present on a business trip to Edmonton and district.

Mrs G F Talbot, of Calgary spent last week-end in town visiting her daughter, Mrs C Ambury.

All interested in the local badminton club are requested to attend a meeting in the court building at 7:30 tonight (Thursday)

Harvey Nicholson, who spent his boyhood days at Seven Persons and Medicine Hat, met death in his air plane near Pungatungishan Ont. last week-end

Mr N Meldrum, of the Dominion Glass plant, spent a few days in Edmonton this week on business in connection with the plant.

Premier Aberhart has been confined to his bed for a week suffering from a severe cold. Treasurer Cockcroft and secretary Manning are also on the sick list.

The Medicine Hat Social Credit constituency executive has arranged zone boundaries and assembly meetings in accordance with the new condition of the Alberta Social Credit league. This constituency made up of four townships, including Redcliff, Dunmore and Pinn's Lake, has been formed into six zones.

C Ambury's bake shop on 7th st. has undergone a complete renovation during the past few weeks. A fine new hard wood floor has been put down and the ceiling, walls and woodwork have been cleaned and painted. This has made a big improvement on the surroundings inside and presents a clean tidy appearance.

Gordon Memorial Young Society entertained their sister society from Westminster Church Medicine Hat, last Friday evening. As it was a Halloween party the guests were greeted by ghosts who led them to "spook alley." Games and contests of various kinds made up a most interesting and enjoyable social evening during which refreshments were served.

Mr Frank Edwards of Bingville is now sporting a new car

Mr and Mrs C L Hicks spent last week-end in town visiting the former's mother Mrs Hicks

Mrs Rosenburger returned home to Bingville after spending a visit with friends in Pincher Creek

Mrs J Martin returned home to Manyberries last Sunday after visiting Mr and Mrs E G Martin here.

St Ambrose A Y P A members were entertained at St Bruns Church Medicine Hat last Monday evening. All report a most jolly visit.

The weather during the past week has been ideal in this part of the province. It has been real Sunny Southern Alberta fall weather.

Young Richard Cooper, who has been in the hospital for some time was able to return home last week end. He is now able to be around again and is improving nicely.

Miss Sheldon, of Edmonton who has been visiting at the home of Mrs Sellhorn for the past few weeks, is leaving for Calgary on Sunday Next to join the V O N.

The Parochial Council of St Ambrose church served a most tasty fish and chip supper in the parish hall last Friday between 5:30 and 7:30 p.m. There was a good attendance and all felt they were exceedingly well fed. After the supper there was a movie show which pleased the audience.
